

# Lake Street Project

The first phase of work to bring the Wayzata Lake Effect to life is starting soon, with the goal of better preserving our Lake Minnetonka shoreline for generations to come. This community-led vision includes multiple projects and improvements that will promote a safe and active downtown and public lakefront that protects and celebrates the Lake Minnetonka experience.

**The Project:** Lake Street from Barry Avenue to Broadway Avenue will be reconstructed to be more pedestrian and bicycle friendly. The beautiful, multi-use Plaza Park near the lakefront will allow for additional gathering space for events and activities year-round. Lastly, connections to the trail on the south side of Lake Street from Barry Avenue to Ferndale Road will be improved.

**The Timeline:** Construction is anticipated to begin in early 2020.

**The Impact:** During construction, businesses will continue to be open and accessible. Clearly marked detours will be available to help residents and visitors navigate their favorite businesses and access the lakefront and its many amenities while the project undergoes completion. Parking will be available at the City's Mill Street Parking Ramp.

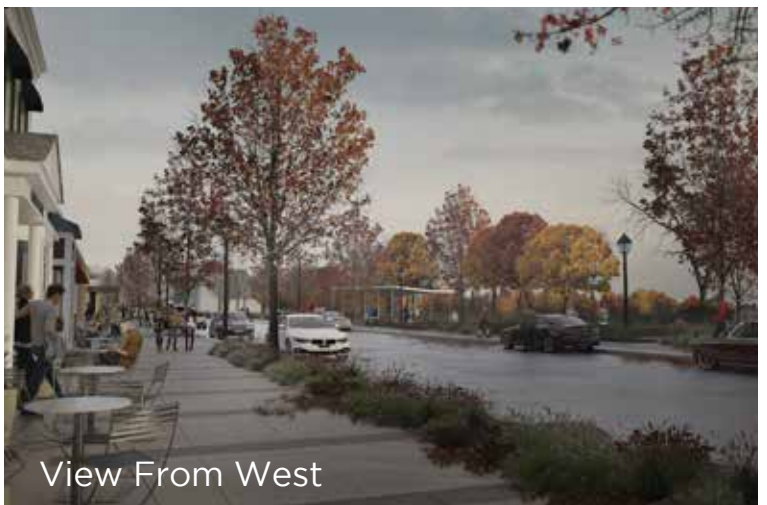

**The Benefit:** This project will bring the Wayzata Lake Effect to life. Hundreds of people from the community have worked collectively to shape a vision for the lakefront that will positively impact the city and fellow neighbors. Built on the three core values of being connected, clean and welcoming, the project aims to reconnect residents to Lake Minnetonka and preserve the shoreline of the city's greatest natural asset for future generations.
